

Introducing the

GRAiT™

S Y S T E M

The GRAiT™ System integrates interactive mapping and your Organization's inspections instantly from your Mobile Device; keeping you informed in real-time and giving you the power to make better decisions faster.

How does the GRAiT™ System benefit your Organization?

Maintain & Manage

- Integrate your business systems with GRAiT™
- Enhance your existing asset management, facilities, and CMMS systems
- Evidence based approach to operations and management

Workflow Consolidation

- Replace paper forms (ie. SLA/warranty information) optimize use of mobile devices
- Streamline inspections, inventory and attendance tracking
- Reduce redundancy and increasing efficiency

Establish Best Practices

- Take an evidence based approach to extending asset life-cycle
- Leverage Key Performance Indicators in order to establish predictive maintenance

- ✕ Establish how your facilities are performing in real time through continuous monitoring of your "assets"
- ✕ Collect field data seamlessly and easily generate automated reports, dashboards and key performance indicators
- ✕ Leverage GIS with integrated maps and floor plans to quickly locate, navigate, and alert personnel of asset condition
- ✕ Automate time consuming, inefficient manual processes and ad hoc tools currently being used to make your workforce even more efficient
